# Three Eskimo Beauties

## Hybrid Rugosa Roses

**T**HE Roses that grow where no others will. Hybrid Rugosa Roses in which are combined the best qualities of the different Rose species. The Rugosa Rose was introduced from Japan. It is absolutely hardy, with fine, thick, heavy foliage. Flowers are single.

By crossing the Rugosa Rose with the best of the double, everblooming varieties, a new race has been evolved in which are retained the fine, vigorous growth, the extreme hardiness, the abundant and lasting dark, green leaves of the Rugosa type, combined with the size and color of the best everblooming Roses.

Once planted, they are permanent; no pruning, no spraying, no suckering nor anything else is needed—just a little manure spaded in and the ground stirred—and they will last for years and yield an abundance of large, double, fragrant, colorful blooms—the only really good dependable Roses for very cold climates. That is why they are called Eskimo Beauties.

Three for \$5.00 or \$1.75 each

**“The Hardest of Hardy Roses”**  
THE KIND THAT GROW WHERE NO OTHERS WILL

# Hybrid Rugosa Roses

Pink - White - Red

**Conrad F. Meyer**

AN ESKIMO BEAUTY—PINK

The blooms are large and full, the petals gracefully incurved. Bright, clear, lively pink.

**Sir Thomas Lipton**

AN ESKIMO BEAUTY—WHITE

Pure white; no tinge of pink or yellow—just pure white. The flowers are very double and borne in graceful clusters.

**Hansa**

AN ESKIMO BEAUTY—RED

Handsome in bud and bloom. Both are large, very full and double. The color is rich, maroon-red.

The three for \$5.00 or \$1.75  
each

## Eskimo Beauties Grow, Thrive and Bloom Anywhere

They are the ideal cold-climate Roses.

Eskimo Beauties—Rugosa Hybrid Roses—are free from mildew, disease and pests that attack other classes of Roses.

They will grow in the South and in the Middle West; they will stand the Winters of Minnesota and Wisconsin and the Dakotas without protection; in hardiness and vigor, they are kindred of the Fir and Spruce.
